Turnstile Gate

TWLD-TS2700

The Semi-Automatic Tripod Turnstile ensures smooth and easy passage with minimal passing resistance. It offers versatile working modes, including bi-directional and single-directional operation, all configurable through buttons on the main control board.

In case of a power outage, the arms automatically drop for unimpeded access. Additionally, the turnstile features obstacle detection with automatic stopping for enhanced safety. It can also be seamlessly integrated with facial recognition biometrics and other contactless systems for a no-touch user experience.
